

# Password Manager Tips For Students

A Free Option:

**LastPass**...

Good password hygiene can be annoying, especially for students who have accounts with many applications and websites.

Consider using a password manager to significantly strengthen your personal cyber security while making logging in easier!

## What does it do?

A password manager gives you a central place to store all of your passwords in an encrypted application. When you need to input a password, just visit your password manager.

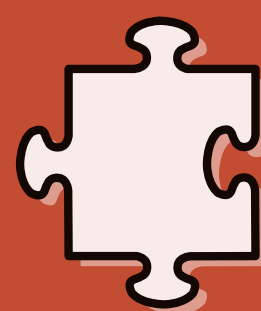

## Why is it important?

The average student does not follow best password security practices below because doing so by memory is incredibly challenging!

## Password Security Best Practices

**At least 8  
characters long**

**2+ capital letters  
2+ lower case letters  
2+ numbers  
2+ symbols**

**Do not use the same  
password for two  
accounts**

**Do not use words  
found in a  
dictionary**

**Randomize with  
your password  
manager**

**Reset Regularly**
